

SSYADD1/MSYADD1 Midterm Rubric

Please input values in the yellow shaded cells.

Overall Assessment

I. Group Assessment (DOCUMENTATION & PRESENTATION)

Category	A	E	R
Overall Documentation	Able to write well-written, well-organized, easy-to-understand documents; all graphs, tables, figures, and equations are well-suited and strongly support content; complies with the prescribed format	Able to write readable documents; paragraph development is present but not perfect; a few editing is required; some graphs, tables, figures, and equations are well-suited and support content; generally complies with the prescribed format	Able to write a readable document; logical organization of the paragraphs generally exist, but some ideas are not fully developed; some editing is required; a few graphs, tables, figures, and equations are well-suited and support content; generally complies with the prescribed format
Event Table/s	-The event table is exceptionally complete and clear. All columns are well-defined, and there are no significant omissions or ambiguities. -All events listed are highly relevant to the system's functions and have clear, well-established connections to use cases. -The event table is entirely consistent in formatting, terminology, and structure, enhancing readability and understanding. -Comprehensive documentation is provided, offering clear context and a thorough explanation of the event table's purpose and usage.	-The event table is generally complete and clear. Most columns are well-defined, but there may be minor issues or omissions. -The majority of events listed are relevant to the system's functions and have clear connections to use cases, but there are minor exceptions. -The event table is generally consistent in formatting, terminology, and structure, with only minor inconsistencies. -Adequate documentation is included, providing some context and explaining the purpose of the event table, but there may be room for improvement.	-The event table is somewhat complete but lacks clarity. Some columns may be unclear or contain incomplete information. -Some events listed are relevant, but there are significant instances of irrelevant events or unclear connections to use cases. -There are notable inconsistencies in formatting, terminology, or structure throughout the event table. -Limited documentation is provided, but it lacks sufficient detail to fully understand the event table's context and purpose.

Use Case Diagram	-The diagram is exceptionally clear and complete. All use cases, actors, and relationships are well-defined, and there are no significant omissions or ambiguities. -The diagram is entirely correct and consistent in use case naming, actor roles, and relationship representations. -The diagram is entirely relevant to the system proposal, including all necessary use cases, actors, and relationships. -The diagram is excellently formatted, well-organized, and visually appealing, enhancing its readability and comprehension.	-The diagram is generally clear and complete. Most use cases, actors, and relationships are well-defined, but there are minor issues or omissions. -The diagram has minor errors in use case naming, actor roles, or relationship representations but generally maintains correctness and consistency. -The diagram is mostly relevant to the system proposal, but it may contain a few non-essential elements or overlook minor components. -The diagram is reasonably well-organized and visually appealing, with only a few minor formatting issues.	-The diagram is somewhat clear but lacks completeness. Some use cases, actors, or relationships are unclear or missing. -The diagram has several errors in use case naming, actor roles, or relationship representations, causing some confusion or inconsistency. -The diagram includes some irrelevant elements, and it may lack critical components, making it challenging to grasp the system's scope. -The diagram is somewhat organized but lacks visual appeal. It may have minor formatting issues.
-------------------------	---	--	--

Use Case Full Description	-The use case description is exceptionally complete, including all necessary components (preconditions, postconditions, main flow, alternate flows, and exception flows) with no significant omissions, providing a comprehensive view of the use case. -The use case description is exceptionally clear, well-organized, and easy to follow, with a clear and concise presentation of actions and responses. - The use case description is entirely focused on relevant information, providing a clear and concise explanation of the use case's purpose and functionality. -Comprehensive documentation is provided, offering clear context and a thorough explanation of the use case description's purpose and usage.	-The use case description is generally complete, covering most essential components, but there are some minor issues or omissions that do not significantly hinder understanding. -The use case description is generally clear, but it may have minor issues in organization or language that require improvement for better comprehension. -The use case description is mostly relevant to the use case's purpose, with only minor exceptions or minor details that do not significantly detract from relevance. -Adequate documentation is included, providing some context and explaining the purpose of the use case description, but there may be room for improvement.	-The use case description is somewhat complete but lacks detail or may have minor omissions in key sections, making it challenging to fully grasp the use case's purpose and functionality. -The use case description is somewhat unclear, lacking proper structure or organization, leading to difficulties in understanding the actions and responses. -Some parts of the use case description are relevant, but there are significant instances of irrelevant details or unclear connections to the use case's purpose. -Limited documentation is provided, but it lacks sufficient detail to fully understand the use case description's context and purpose.
Entity Relationship Diagram	The ERD is exceptionally complete, including all necessary entities, relationships, attributes, and cardinalities with no significant omissions, providing a comprehensive view of the data model.	The ERD is generally complete, representing most entities, relationships, attributes, and cardinalities, but there are minor issues or omissions.	The ERD is somewhat complete but lacks clarity in some areas. Some entities, relationships, attributes, or cardinalities are unclear or omitted.

Context Diagram	-The context diagram is exceptionally relevant to the proposed solution, effectively illustrating how the system's context aligns closely with the project's goals. It provides a highly relevant representation of the solution's context. -The context diagram is entirely correct, accurately representing system boundaries, external entities, data flows, and processes, providing an accurate and reliable context for the proposed solution.	-The context diagram is generally relevant to the proposed solution, with clear connections between the system's context and the solution's objectives. There may be minor areas where relevance could be improved. -The context diagram is generally correct, with minor errors or inaccuracies in the representation of system boundaries, external entities, data flows, or processes. These issues do not significantly impact understanding.	-The context diagram is somewhat relevant but lacks a clear connection to the proposed solution. It may include irrelevant interactions or elements that do not align well with the project's goals. -The context diagram has some correctness issues, with errors or inaccuracies in the representation of system boundaries, external entities, data flows, or processes. It may require significant revisions for accuracy.
Data Flow Diagrams	-The DFD seamlessly extends the context diagram, effectively expanding upon its boundaries and interactions. The relationship between the two diagrams is well-established and coherent, providing a clear understanding of how the system functions within its context. -The DFD composition is exceptionally well-organized, with clear and concise representation of processes, data flows, data stores, and external entities. It effectively communicates the data flow within the system.	-The DFD aligns with the context diagram, providing a clear and logical expansion of the context diagram's boundaries and interactions. The relationship between the two diagrams is evident, but there may be minor discrepancies. -The DFD composition is generally organized and includes most essential components (processes, data flows, data stores, external entities), but there may be minor issues in labeling, organization, or clarity.	-The DFD has some connection to the context diagram, but the relationship is not well-established or is somewhat unclear. It may not effectively expand upon the context diagram's representation. -The DFD composition is somewhat disorganized, and some essential components may be missing or unclear. The diagram lacks proper labeling and organization, reducing its effectiveness in illustrating data flow.

User Stories with Acceptance Criteria	-The user story is exceptionally clear, with a concise title and a comprehensive explanation of who the user is, what action they want, and why. It is easy to understand the user's needs and goals. -The acceptance criteria are exceptionally complete, including all necessary conditions and providing clear and detailed requirements for development and testing. They leave no significant ambiguity about what needs to be done.	-The user story is generally clear, with a concise title and a clear explanation of the user's needs and goals. However, there may be minor issues or omissions that affect clarity. -The acceptance criteria are generally complete, covering most essential conditions, but there may be minor omissions or a lack of detail in certain areas that affect completeness.	-The user story is somewhat clear but lacks some clarity in the title or the explanation of the user's needs and goals. Some essential details may be missing. -The acceptance criteria are somewhat complete but lack clarity or detail in some areas. Some critical conditions may be omitted, making it challenging to determine the story's completeness.
Language Conventions	The writing is free or almost free of errors.	There are occasional grammatical errors.	There are periodic grammatical errors.
Use of References	Compelling evidence from professionally legitimate sources is given to support claims. Attribution is clear and fairly represented.	Professionally legitimate sources that support claims are generally present and attribution is, for the most part, clear and fairly represented.	Although attributions are occasionally given, many statements seem unsubstantiated. The reader is confused about the source of information and ideas.
Quality of References	References are primarily peer-reviewed professional journals or other approved sources. The reader is confident that the information and ideas can be trusted.	Although most of the references are professionally legitimate, a few are questionable. The reader is uncertain of the reliability of some of the sources.	Most of the references are from sources that are not peer-reviewed and have uncertain reliability. The reader doubts the accuracy of much of the material presented.
Presentation Organization	Well thought out with logical progression; significance clearly stated; use of proper language; content level appropriate for audience; strong opening and closing	Talk easy to follow; content was presented in mostly logical sequence; significance clearly stated; content level not always appropriate; use proper language; fairly strong opening and closing	Talk somewhat disorganized; content was presented in inadequate sequence; shows somewhat effort to use proper language; significance somewhat unclear; includes irrelevant content and inappropriate content level; weak opening and closing

Creativity and Visual Aids	Tables and graphs summarizes data and/or conclusions; size and label are clear; very little text; figures and images explained and described well; presentation has no misspellings or grammatical errors	Text appropriately sized; very little text; most figures and images explained and described well; presentation as occasional misspelling or grammatical error	Labels and legends somewhat unclear; text size somewhat small; too much detail on slides; blocks of text on slides; figures are explained; presentation has multiple misspellings and/or grammatical errors
Listening & Comprehension	Able to concentrate fully and listen very attentively to ideas spoken by groupmates, panelists and/or adviser; shows excellent comprehension of all information received; able to consolidate inputs and accurately relay all information	Able to mostly be attentive and listen with good concentration to ideas spoken by groupmates, panelists and/or adviser; shows good comprehension of all information received; able to consolidate inputs and relay mostly accurate information	Able to somehow be attentive and listen with fairly good concentration to ideas spoken by groupmates, panelists and/or adviser; shows good comprehension of most information received; able to consolidate inputs and relay some accurate information
Group Participation / Quality of Interaction	All assigned students enthusiastically participated; students reflected awareness of other's views and opinions; each student assigned a clearly defined role; group members performed roles effectively	All assigned students enthusiastically participated; students showed adeptness in interacting; each student assigned a role but not clearly defined or consistently adhered to	There was little / no interaction among assigned students; students assigned roles but were not consistently adhered

III. Individual Assessment (Refer to table starting from Row 41 below and the Legend from I1to J5))

Name	Style / Delivery	Ability to Answer Questions	Work Ethics / Project Contribution
Lerum, Rommel John Jeric			
Manantan, Aaron Gabriel			
Pauig, Angela Glaire			

Reference for the Individual Assessment

Category	A	E	R
Style / Delivery	Uses time wisely; poised, clear articulation; proper volume; steady rate of speaking; good eye contact; does not read information; enthusiastic; confident; uses engaging tone and appropriate vocabulary	Clear articulation but not polished; volume and rate of speaking fluctuated; some eye contact; speaks well, but often repeats comments; some enthusiasm and confidence; uses good vocabulary and tone	Presentation poorly timed; some mumbling; some hesitation and uncertainty are apparent; volume uneven; little eye contact or enthusiasm; looks at notes; monotone and non-engaging delivery
Ability to Answer Questions	Anticipates audience questions; understands audience questions; can integrate knowledge to answer questions; thoroughly responds to questions	Does not anticipate audience questions; understands audience questions; can integrate knowledge to answer questions; thoroughly responds to most questions	Does not anticipate audience questions, makes an effort to address question; can address some questions; often responds poorly to questions
Work Ethics / Contribution	Demonstrates personal accountability and effective work habits all the time; punctual in submitting requirements; understands the impact of non-verbal communication or professional work image; exhibits APC core values (integrity, industry, and innovation); shows excellent awareness, and greatly influences others of the social impact of their product	Often demonstrates personal accountability and effective work habits all the time; often punctual in submitting requirements; understands the impact of non-verbal communication or professional work image; exhibits APC core values (integrity, industry, and innovation); shows awareness, and influences others of the social impact of their product	Sometimes demonstrates personal accountability and effective work habits all the time; sometimes punctual in submitting requirements; exhibits APC core values (integrity, industry, and innovation); shows awareness, and influences others of the social impact of their product

Other Comments/Suggestions for Improvement

Legend	Score Range
I: Introduced	61-70
R: Reinforced	71-80
E: Expanded	81-90
A: Achieved and Assessed	91-100

	Rating (I, R, E, A)	Score	Comments
I			
Able to complete a document; logical organization of the paragraphs generally exist, but some ideas are not fully developed; significant editing is required; a few graphs, tables, figures, and equations are well-suited and support content; minimal compliance with the prescribed format			
-The event table is incomplete and unclear. Essential columns (event, trigger, source, related use case, response, destination) are missing or poorly defined. -The events listed in the table are largely irrelevant to the system's functions or do not correspond to use cases. -The event table lacks consistency in terms of formatting, terminology, or structure, leading to confusion. -There is no or very minimal documentation accompanying the event table to explain its context, purpose, or usage.			

-The diagram is unclear and lacks essential components. Use cases, actors, and relationships are poorly defined or missing. -The diagram contains numerous errors in use case naming, actor roles, or relationship representations, leading to confusion or inconsistency. -The diagram includes irrelevant use cases, actors, or relationships, or it lacks essential components necessary to understand the system proposal. -The diagram is poorly formatted, cluttered, and visually unappealing, making it challenging to read and understand.			
---	--	--	--

-The use case description is incomplete, lacking essential components such as preconditions, postconditions, or main flow events. Significant omissions impair the understanding of the use case. -The use case description is highly unclear and poorly structured, making it extremely challenging to follow or understand the actions and responses. - The use case description includes irrelevant information or fails to focus on the core purpose of the use case, making it confusing and unfocused. -There is no or very minimal documentation accompanying the use case description to explain its context, purpose, or usage.			
The ERD is incomplete, lacking essential entities, relationships, attributes, or cardinalities. Key components are missing or undefined.			

-The context diagram is highly irrelevant to the proposed solution, showing interactions or elements that do not align with the project's objectives. It does not contribute to understanding the system in the context of the solution. -The context diagram contains significant errors or inaccuracies in the representation of system boundaries, external entities, data flows, or processes. It does not provide an accurate portrayal of the system's context.			
-The DFD does not show a clear relationship with the context diagram or fails to align with the context diagram's boundaries and interactions. The context of the system is unclear. -The DFD composition is highly disorganized and lacks essential components. It does not clearly depict processes, data flows, data stores, and external entities, making it challenging to understand the data flow within the system.			

-The user story is highly unclear, lacking a concise title, or a clear explanation of who the user is, what action they want, and why. It is difficult to understand the user's needs and goals. -The acceptance criteria are highly incomplete, missing essential details or conditions that must be met for the user story to be considered complete. They are insufficient for development and testing.			
There are many grammatical errors.			
References are seldom cited to support statements.			
There are virtually no sources that are professionally reliable. The reader seriously doubts the value of the material and stops reading.			
Talk difficult to follow; little thought given to sequence of content; repetitive; transitions choppy; does not understand significance of work; unclear language; lacked opening and closing			

Labeling is not clear; size is too small to see; no logical placement of information; mostly text and very few images; figures are not explained; presentation has numerous misspellings and/or grammatical errors			
Able to somehow be attentive and listen with enough concentration to ideas spoken by groupmates, panelists and/or adviser; shows comprehension of some information received; able to consolidate inputs and relay a few accurate information			
There was little / no interaction among assigned students; some students disinterested; little effort made to assign roles to group members

I
Presentation poorly timed; Speaking inaudible or too loud; very little eye contact; rate too slow; speaker seemed uninterested; speaks to quietly or quickly for audience to hear and understand
Either makes no effort to respond to questions or does so poorly
Sometimes demonstrates personal accountability and effective work habits all the time; sometimes punctual in submitting requirements; exhibits APC core values (integrity, industry, and innovation); does not show awareness of the social impact of their product
